WHAT WAS DONE IN STOCKS. Friday, Dec. 4-p? m.

The stock market was fairly firm in the morning hours to-day. Missouri Pacific seemed to be pressed for sale, and it fell rather abruptly something over 1 per cent. The liquidation in Northern Pacific preferred was continued, and a few other stocks were heavy, but the Granger shares were strong at slowly advancing figures. Shortly after noon a new element in speculation was introduced by an attempt to take the life of Russell Sage. The market was paralyzed at once, and it was not until the last hour that the possible destruction of securities by the explosion of the bomb intended for him became a depressing influence. Mr. Sage is a large lender of money, and the uneasiness which was aroused by the wrecking of his office was not irrational. The securities could have been replaced in time, but the delay which might have resulted from the destruction of them might have caused serious inconvenience to even strong firms. It was a relief to discover that there will be no complications on this account. The securities which happened to be in his office at the time were

plications on this account. The securities which happened to be in his office at the time were placed in the safes of the Manhattan Railway in the adjoining offices on the same floor, and probably the only loss of this kind was a certificate for 100 shares of stock which was just being delivered on a call.

It was greatly to the credit of the bear faction in the stock market that no advantage from the calamity was attempted to be taken. The selling which was aroused by the possibility of confusion in loans was not for the short account, but apparently by timid holders. One trader was believed to have sold 30,000 shares of stock which had been bought in anticipation of a rise. Unless this theory was entirely wrong, the bear faction was not aggressive, and the stocks which might be affected reasonably by the sudden death of Mr. Sage rallied toward the close. The flurry in the rates for call loans was not connected in any way with the calamity, but was due to a lack of offerings when a belated demand sprang up. The higher rates were in force for only a short time when the supply of loanable funds was far beyond the requirements.

Although the final changes were generally declines, they rarely reached 1 per cent, and the substantial dividend-paying stocks were as weak as others which have no hope of entering that class. The Gould stocks were depressed throughout the day, and Missouri Pacific suffered a final loss of over 1 per cent, although it rallied from its lowest point. The Vanderbilt stocks and Barlington and Quincy were exceptionally strong, and they recorded small advances. The closing was dull and heavy.

The foreign exchanges were dull and strong without great changes in rates. The supply of commercial bills was not liberal. Following are the quotations for actual business: Pankers' bills. \$4 \$1 1-2 and \$4 \$48\$4 \$4 1-4 for long and short sterling respectively; French francs, 5.23 1-8 and 5.20 5-8; reichmarks, 94 5-8a95 1-8.

In London British consols advanced 3.16 to 95 3-16 for money, and 1-8 to 95 3-8 for the account. The Bank of England gained £5,000 bullion on balance. In the open market money was again easier at 2 1-2a2 5-8 per cent for discounts and 1 1-2a2 per cent for daily balances. Bar silver was barely steady at 44 1-4d, an otnee. American railway shares advanced until the late dealings, when small concessions were made. At Paris French 3 per cents reacted to 95.60a 95.67 1-2.
